Examiner, Art Unit 2624

Reasons for Allowance

1. Claims 1-8, 10-12, 14, 16-23 and 26-27 (renumbered 1-22) are allowed.

The following is an examiner's statement of reasons for allowance: amendments filed March 11, 2009 overcome the previously outstanding rejections as set forth in the previous Office Action (mailed December 11, 2008) (see item 3. "Statement Regarding 35 U.S.C. § 101 and In re Bilski" below). Particularly, the claim features of "synthesis section for synthesizing, substantially contemporaneously and subsequent to extraction of the characteristic portion data by said extraction section, the characteristic portion data of the sampled partial image extracted by said extraction section and characteristic portion data of the previously sampled partial image based on the relative positional relationship of the sampled partial image detected by said detection section and outputting a result of the synthesis as organism characteristic data of the portion of the organism for the at least one of registration organism characteristic data storage and an authentication unit for authenticating the identification object person using sampled partial images forming less than an entire image of the portion of the organism sampled in said sampling," common to the independent claims, is not fairly taught or suggested by the prior art of record alone or in combination. Accordingly, no outstanding rejections or objections remain.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on February 6, 2009 is in compliance with the provisions of 37 C.F.R. § 1.97. Accordingly, the IDS has been considered by the examiner.

Statement Regarding 35 U.S.C. § 101 and In re Bilski

3. Applicants' amendments to the independent claims has overcome the previously outstanding grounds of rejection under 35 USC §101. Specifically, the amended claims now require a particular machine in the form of "a processor" which performs the critical steps of the method; thus, the independent claims now "tied to" at least a processor. See *In re Alappat* 33 F.3d 1526 (1994), where the majority stated: "We have held that such programming [e.g. of a processor to perform the claimed steps of the method] creates a new machine, because a general purpose computer [e.g. a processor] in effect becomes a special purpose computer [e.g. a processor performing the steps of the method] once it is programmed to perform particular functions pursuant to instructions from program software. *In re Freeman*, 573 F.2d 1237, 1247 n.11, 197 USPQ 464, 472 n.11 (CCPA 1978); *In re Noll*, 545 F.2d 141, 148, 191 USPQ 721, 726 (CCPA 1976); and *In re Prater*, 415 F.2d at 1403 n.29, 162 USPQ at 549 n.29."
